September 2022

William L. Pierce, Rocket Scientist

William Pierce, prior to devoting his life to working for his race full time, was an academic and — literally — a rocket scientist. While in his 20s, after receiving his bachelor of science degree in physics, he worked for a while at the Los Alamos Scientific Laboratory in New Mexico, where the team on which he worked was attempting to control nuclear fusion. Then he spent a year at the California Institute of Technology, furthering his graduate studies. A year later he accepted a position at the nearby Jet Propulsion Laboratory, where much of America's interplanetary exploration program was being developed. He specialized in rocket instrumentation. Fifteen months there was followed by his receiving a master's degree, then his doctorate in physics — all while still in his 20s. He went on to teach physics at Oregon State University, first as an assistant professor, then professor, and was granted tenure in less than three years — something which was quite rare

ELECTRICALLY INDUCED NUCLEAR QUADRUPOLE SPIN
TRANSITIONS IN A GaAs SINGLE CRYSTAL

by

William Luther Pierce

B.A., Rice Institute, 1955

M.A., University of Colorado, 1959

A Thesis submitted to the Faculty of the Graduate
School of the University of Colorado in partial
fulfillment of the requirements for the Degree

Doctor of Philosophy

Department of Physics

1962

and which gave him job security for life while just 32 years old. He left His OSU teaching position to work at a much more lucrative job in private industry as senior research scientist at Pratt & Whitney Advanced Materials Research and Development Laboratory in Connecticut. While there he was spending a lot of time in the Yale University library, reading extensively about his interests in

Substituting (9) into (8) gives:

$$\frac{H}{H_0} = \left[1 + \frac{4\pi^2}{3} \frac{|\rho|^2}{\hbar^2 \omega^2} \right]^{-1/2} \quad (10)$$

II. QUADRUPOLE MATRIX ELEMENTS

For an arbitrary nuclear charge distribution ρ , we can write the interaction energy with a set of external charges, which, in the absence of ρ , would generate a potential $V(x^i)$, thus:

$$U = \int_{\text{nucleus}} \rho(x^i) V(x^i) dv = e \sum_{\text{protons}} V(x^i).$$

We expand $V(x^i)$ in a Taylor series about the center of the nucleus:

$$V(x^i) = V(0) + \frac{\partial V}{\partial x^i} x^i + \frac{1}{2} \frac{\partial^2 V}{\partial x^i \partial x^j} x^i x^j + \dots$$

(Summation over $i = 1, 2, 3$ is implied for repeated indices.)

The interaction energy becomes:

$$U = V(0) \int \rho dv + \frac{\partial V}{\partial x^i} \int \rho x^i dv + \frac{1}{2} \frac{\partial^2 V}{\partial x^i \partial x^j} \int \rho x^i x^j dv + \dots$$

or

$$U = eZV(0) - \vec{E} \cdot \vec{p} + \frac{1}{2} \frac{\partial^2 V}{\partial x^i \partial x^j} \int \rho x^i x^j dv + \dots$$

Writing the components of the field gradient tensor $\frac{\partial^2 V}{\partial x^i \partial x^j}$ as V_{ij} , we make use of the following identity:

race, demographics and related subjects. This is all just part of the background of the life of the brilliant founder of the National Alliance.

By 1964, Dr. Pierce had put his career as a physicist behind him, met Commander George Lincoln Rockwell, moved his family to Fredericksburg, Virginia, and commuted to Arlington, Virginia. There he worked with Rockwell and launched his new career as a writer on the subjects that had become all-important to him. His first big project was to publish the quarterly journal *National Socialist World*. Thoughtful Alliance members will appreciate just how intelligent and capable Dr. Pierce was — and what he sacrificed when he began his 38-year struggle for our race. He describes the subject of his doctoral thesis:

My doctoral research was on nuclear magnetic dipole and electric quadrupole interactions in a GaAs crystal. What that means is that I studied

certain types of magnetic and electrical interactions between the nuclei of the various isotopes of gallium and arsenic in a gallium arsenide crystal with externally applied magnetic and electrical fields. With the extremely sensitive equipment I designed and built, I could 'shock' the atomic nuclei in a crystal into an 'excited' state and then watch them decay to their 'ground state' by looking at the very weak radio-frequency signal they emitted while decaying. With this technique, one can learn many things about crystal structure and about the electrical and magnetic properties of the atomic nuclei in a crystal. Gallium arsenide is a material much used in modern semiconductor devices.

How does one go from that rigorous discipline to being named "the most dangerous man in America" by Jewish hate groups? The founder and first chairman of our National Alliance decided his life would be better spent working for the preservation of, and securing a future for, White people. Why did the Federal Bureau of Investigation declare that if it could ban any book in America, Dr. Pierce's 1978 novel, *The Turner Diaries*, would top the list? The book by itself is not dangerous, but the ideas in it — of White renewal through revolution — are good for us, while at the same time very dangerous for the criminal Jewish cabal. Of course the FBI can't ban books, but the world's largest bookseller, Amazon, under pressure from Jews, can do so, and they in fact have banned *The Turner Diaries* and other books we publish.

Incidentally, to get a feel for how far the study of physics has fallen in the 60 years since Dr. Pierce was teaching his graduate students, one should read "A Sign and Portent: 'Alternative Ways of Knowing'" by David Sims, published on 20 September on *National Vanguard*. Mr. Sims is a physicist himself, and

formerly was on our Alliance's National Office staff as Dr. Pierce's editor.

Cosmotheist Books

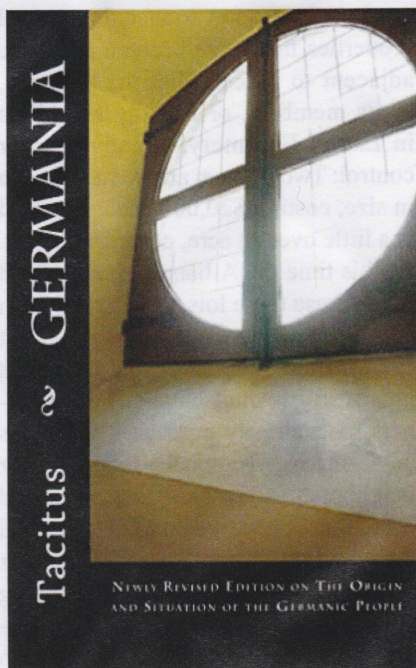

Three supporters sent a total of eight cases of books to our National Office this month to be included in the William Luther Pierce Memorial Library and Research Center. Writer and former National Office staffer under Dr. Pierce, N.R., personally visited us to deliver his donated books. He left with copies of *Pocahontas Show Trial* (which he will review); *Cosmotheism: Religion of the Future*; and *Will Vaccines Be The End of Us?* that we hope he will also review. M.O. and J.H., who have both shipped cases of well-collected books and periodicals to us previously, sent an additional two cases this month.

Andrew Hamilton wrote on our online magazine *National Vanguard* in his article "Tacitus' Germania":

It is important to leave most contemporary academic and other racist works aside, not waste time on them, and read works by our own people written closer to the time when they were not a servile, beaten down, self-hating population.

We have offered [Roman historian and aristocrat Cornelius] Tacitus' *Germania* at our online bookstore for several years, but recently sold out that title's inventory. We have now ordered another supply of this important book, this time in a newly revised edition with chapter titles; we should have it back in stock by the time this **BULLETIN** is in the mail. Andrew Hamilton again:

The *Germania* [written c. 98 AD] has been the most influential source for the early Germanic peoples since the Renaissance. Its reliable account of their ethnography, culture, institutions, and

geography is the most thorough that has survived from ancient times, and to this day remains the preeminent classical text on the subject. The book signifies the emergence of the northern Europeans from the obscurity of archaeology, philology, and prehistory into the light of history half a millennium after the emergence of the southern Europeans in Homer and Herodotus.

Additional titles will be added to our bookstore next month.

Opportunities for Community Expansion

Those who have received the National Alliance **BULLETIN** this year know that our Alliance's Tennessee Cosmotheist Community has been expanding its campus. There will be further expansion of Alliance property as funding from our members and supporters becomes available to make that happen. For

now, we want to announce three small properties that have become available adjacent to parcels that the Alliance, or its members, or friendly neighbors in Laurel Bloomery, already own or control: Two of them are two acres each in size, costing \$20,000 each; the third is a little over an acre, costing \$12,000. At this time the Alliance cannot afford to purchase these lots, which have been offered to us by our neighbors — but Chairman Williams has told them that he will try to find buyers. Two members have already purchased three lots adjacent to our National Office from our neighbors this year, and have relocated here. This is how we build our physical community, without real estate agents or other unnecessary middlemen becoming involved. So if any members or supporters are interested in purchasing an adjacent, wooded, Community building lot for a future home, or wish to secure one for another member, contact Chairman Williams.

Correspondence: Telling Us How It Is

Most exceptional people who seek to understand the Cosmos have been members of the Aryan race. The modern world with all the technology we have today wouldn't exist without such people. These have always been a small, exceptional minority among Aryans. Most Aryans are ordinary people; most are not much more brilliant nor less corrupt than the average non-White. Most are so naive they don't realize that their own countries have come to hate them. It is difficult to know how many Whites are aware that this is happening, since talking about these topics can make one a social pariah; one can lose his job or in some countries be jailed. Certainly we can see how many Whites aren't aware or just don't care about what is happening. One can see plenty of Whites with non-White partners; Whites who adopt non-Whites; Whites who prefer to hire Mexican/

Central Americans since they will work cheaper; and the predominantly White freaks of antifa, etc. Some Whites are aware, but just don't care as long as none of it affects their personal lives. Dr. Pierce said over twenty years ago the only thing that can save Whites from extinction is accelerationism: the situation must get much worse for Whites in a very short period of time.

Things *are* getting worse and accelerating like never before. This will help to wake up masses of slumbering Whites, but, more importantly, will energize the minority of Aryans who have the means (intellectual, financial, and moral means, and the "Faustian spirit") to do something. As long as affluent Whites can pay private schools to avoid Mestizo and Black gangs; as long as they can be safe in affluent neighborhoods where they believe income keeps them insulated from Blacks; as long as their money is enough to evade reality, aware Whites with means who love their kin will do nothing. The ultimate solution will be painful when the time comes, not peaceful. — *anonymous comment on NV* (edited)

Chairman Williams responds: Thank you, sir, for telling us what we already know. Dr. Pierce wanted to reach and activate thousands of Whites of means before unfavorable circumstances crossed a line of no return — a line that is now fast approaching. He inspired some of us to act, but like you say, an extremely small minority — not nearly enough. Our current members should be recruiting more members until we finally reach what the physicist defines as critical mass: the size that something must reach before a particular change or goal can happen. Our people need a couple of other things besides adequate funding and many more racially responsible kinsmen: *a sense of urgency and sound leadership*. With its ideology, program, and vision, the National Alliance is the only serious organization that can provide what our people urgently need. If there is another organization out

there that can bring our people victory, someone please let me know.

Hello William and Lana, I was honored to have my letter highlighted in the April **BULLETIN**. It was also nice to have received a phone call to thank me for my donation. During that conversation you mentioned that a doctor had recently made a large donation. I thought that I would not be much of a supporter if I didn't match that member's donation, so here it is!: \$1,000 to match the doctor's, and another \$1,000 to push the Alliance forward. I am glad to see the progress on the newly purchased house and the book warehouse. It's nice to see things moving along so quickly. All the best to you and the rest of the Alliance's members. — *D.S., Texas*

Chairman Williams responds: Things are not moving along as quickly as we'd like to see, D.S., but when we receive a donation as generous as yours for Alliance-building, things do pick up a bit. We just received a bid for the new metal roof for the house, with other material for the task, of more than \$3,000 — not a small sum, but a necessary expense, along with our usual monthly costs. Your donation is the equivalent of 100 members sending a minimum of \$20 per month: a big boost!

Chairman Williams, I like the look on your face on the back of the August **BULLETIN** when you were confronted with the two nonbinary, unisex restrooms. I felt the same way when I first saw such bathrooms. Good Grief! \$20 enclosed for my September dues. Thanks! — *T.B., Indiana*

Chairman Will, included is a copy of the VFW (Veterans of Foreign Wars) magazine so you can see what you are missing. I liked your article on *NV* (<https://nationalvanguard.org/2022/09/an-experience-with-the-vfw/>). My dad gave me a lifetime membership in the VFW when I got back from Iraq. I do not attend their meetings, nor do I salute that flag of the East India Company either. The National Alliance does need its own flag, so \$100 is donated toward that project.

I appreciate what you are doing with the NA

there in Tennessee and with the Alliance's Web sites. While I am still working my corporate slave job I'll try to support the NA as much as possible. Another \$150 enclosed for the following books: *Cosmotheism: Religion of the Future*, *Pocahontas Show Trial* (please sign), *The Fame of A Dead Man's Deeds*, *The Jewish Strategy*, *Pan Judah, vol II*, and *The Saga of White Will* comic book. Sincerely, — *T.N., Indiana*

Chairman Williams responds: Thank you, T.N., for the excellent book order, the donation toward making bulk Alliance flags, and the magazine. The VFW folks quit sending me that PC rag years ago. I put a follow-up comment under the article linked above about a subsequent meeting I attended with a group of Green Beret vets two weeks after that VFW meeting. The result of that gathering of otherwise sturdy White alpha males was similar to the experience I'd had with the VFW meeting, and confirmed for me once and for all why Dr. Pierce called them hopelessly authoritarian yahoos. We'll leave our door cracked for them, however, in case they should eventually become responsible men of their race.

To the National Alliance: Here in California it has been so hot that I rarely leave my air conditioning. I worked in heat all my working life, but now that I am retired I don't want it. I'd like to get to your place in Tennessee. There is a lot of crazy crap going on here and many people are too dumb to stop their stupid TV lives to get beyond the Republican/Democrat phony fight. Enclosed is \$200. I'll be back in touch soon. Thanks, — *J.R., California*.

Chairman Williams responds: Thank you, J.R. It sounds to me that you've had just about enough of California. Heat as well as cold will become even worse when your state suffers the predicted brownouts and blackouts under

your nutty Governor Newsom. Can you believe he wants to run for President?

Chairman Williams, your generosity and faithfulness in sending the National Alliance **BULLETIN** to me each month puts me to shame. I've been mooching freebies for several years now, and, although I enjoy them greatly, you can pull the plug on your largesse at any time. I hope to make it up to you posthumously. With great gratitude and reverence for what you have accomplished and continue to do with the Alliance, — *F.K., Pennsylvania*

Chairman Williams responds: The fact you have named our Alliance as a beneficiary in your will is enough to ensure that you will continue to receive our **BULLETIN**, F.K. Hopefully, you will inspire others to do the same. I enjoy reading about your past exploits on behalf of our people as a racial activist. Please keep those inspiring stories coming.

Dear Will, I never thought I'd live to see such an insane world, but it is to be expected with the filthy Jew running everything into the ground. The US will see debt reach \$50 trillion before long and Mr. Putin will put an end to the dollar as the world's currency. The Jew will be broke and we few White visionaries will be the survivors. Take care my brother! \$90 enclosed for three month's dues. — *W.S., Virginia*

Chairman Williams responds: We hope you are right with that prediction, W.S. History tells us that the Jew always overplays his hand prior to being expelled from a nation. Thanks for increasing your monthly dues from \$25 to \$30.

Dear William: The time and the hours grow shorter with each passing day, and (if it is the will of the Creator) it may not be premature for us to have a private face-to-face beyond the reach of prying eyes and ears. You are always welcome to visit me here, but this year I will be attending the November American Renaissance conference near Nashville. I see it is a four or five hour drive such that I could visit with you on Sunday afternoon.

Your efforts to continue the work of Dr. Pierce are impressive and have made a difference in this world. There is no other man I will confide in at this time, with the possible exception of Mr. Millard — but since I no longer fly a meeting with him is not likely to happen. Sincerely, — *W.S., Michigan*

Dear Chairman Will, I just arrived back from Paraguay the other day. I'll give you a call tomorrow to catch up on things. My son and I have been trying to recruit some folks that we thought had some potential — he with his associates at work and I with my US colleagues that were with me in Paraguay. We both have been striking out. These people are just too far gone and can't seem to, or want to, see what's right in front of them. In my case, one of my colleagues who is of full-fledged German ancestry and considers himself a "conservative," had some understanding of certain things that are going on but would not go far enough in our conversations. I finally just asked him if he felt the White race was worth saving? He hemmed and hawed for a while and I finally said it was a very simple question: yes or no. His response was that if all the world ends up being a bunch of mixed races, then that is fine with him. I told him that was all I needed to know about him. Luckily, he and I can speak like this without it affecting our professional relationship. These are the kind of people I have to deal with every day. Mind you, he is an educated person, a trained Veterinarian... Anyway, that is what I am up against in the community where I work. My son has similar stories with the students and teachers in his school. — *J.H., California*

Chairman Williams responds: I have asked folks that same question: "Yes or no, do you believe the White race is worth preserving?" If a person gives me too much hemming and hawing to such a simple question, I take that as a "no" and don't bother to waste my breath further with him. If he answers "yes," then a follow-up question might be, "Good, so you must understand that we must organize to fight for our preservation, right — yes or no?" The men and women of our race who answer "yes" are worthy of further dialogue and some

National Alliance material. Many, even the so-called “educated,” are too far gone. However, there are others who *are* ready for us. I look forward to the report about your positive experience in Paraguay, especially that area you were in that has so many German and South African expats.

Followup on Campaign to Distribute National Alliance Material on our Founder’s 89th Birthday

Chairman Williams, I was able to distribute 1,100 National Alliance fliers in this area of southwestern North Carolina. While I concentrated much of my efforts in my home county, I also ventured outside Cherokee County, and made brief, but hopefully worthwhile, visits to northeastern Georgia, to the Home Depot parking lot in Blairs-

ville, Georgia; and to far southeastern Tennessee, to the Walmart parking lot in Cleveland, Tennessee. I definitely got “out and about” yesterday and I was able to mingle and interact with my White brothers and sisters. I had some *very* interesting conversations with concerned Southern White folks and ones who expressed what I would consider “cautiously optimistic” interest in membership in the National Alliance. Not to dwell on the negative aspects of yesterday, but I also dealt with some apathetic Whites — some who, judging by their indifference and detachment from reality, have become completely hypnotized and/or harbor a secret satisfaction with the destruction of the White race through miscegenation. I chalked up those morons as being utterly lost souls on whom we should not waste our precious, valuable time. They are beyond redemption. I noticed that one was even carrying her Bible and I thought I heard a dim, but steady “thump, thump, thump” upon its well-worn cover as she walked away. Say no more! — N.G., North Carolina

Commentary by Chairman William White Williams

Tips on Recruiting

The National Office has received several reports like N.G.’s about flier distributions by Alliance members, both via face-to-face contact and by placing our fliers under car windshield wipers, tossing them onto driveways in weighted plastic bags, etc. Thanks to everyone who participated. Don’t stop distributing, though, just because this special campaign commemorating Dr. Pierce’s birthday has passed.

Whenever our organization reaches a sufficient number of members and some Local NA Units again, we will revise the *Membership Handbook* and distribute it to each member. As current members know, our Alliance lost all Local Units and nearly all members in good standing by the time I took over as Chairman eight years ago. The 1993 edition of the

Handbook was before the presence of the Internet, social media, and personal smart telephones in people’s lives. It was geared toward Local Unit activities without the possibilities of these information technologies, and so is outdated. We will reach the point again, though, when a *Membership Handbook* is necessary. Much of the *Handbook* consisted of tips from Dr. Pierce on who, and who not, to recruit — and those timeless sections have been published in several issues of this monthly **BULLETIN**. N.G. gives examples of various types of people we may encounter — from the cautiously optimistic to lost souls — which is to be expected when none have yet read what they were handed by him.

Dr. Pierce would occasionally write a memorandum that was not for all

members, but only for Local Unit Coordinators. We do not have space here for the advice he offered to these mid-level leaders, but here is a short section of one of those memos from May 1994 entitled "Watch out for Defeatism" that is still quite relevant and worth sharing:

There is a species of "movement" hobbyist which every Coordinator should beware of: the conspiracy nut. They spell it with a capital "C": it's *the Conspiracy*. They are virtually all subscribers to numerous pro-White periodicals; most are over 40 years old and talk too much. Their hobby horse is an all-powerful, all-knowing group of conspirators (usually international bankers, sometimes Jews and sometimes not) who control everything. The danger that these hobbyists pose for us is that they spread defeatism. According to them the FBI knows the names and addresses of all our members, taps all our telephones, and reads our mail. The FBI and CIA routinely assassinate anyone who poses a threat to the conspirators by knowing too much or becoming too uppity. It is difficult to know whether or not the conspiracy nuts believe any part of what they say, but they certainly do manage to spook a lot of people who otherwise might have been useful. In some cases it is pretty clear that the conspiracy nut's theory that the Conspiracy has everything under control and it's useless to resist is just his excuse for doing nothing; in every case, however, the conspiracy nut is bad news, and his presence should not be tolerated.

Whenever you hear anyone talking about telephone tapping or mail interception by the secret police, you should put a stop to the talk, whether the talker is a conspiracy nut or not. There are enough real dangers we must face, and we don't need any imaginary ones to frighten our members into inaction. I'm not suggesting in the

foregoing that there aren't real conspiracies among our enemies or that we shouldn't talk about these conspiracies when we know something about them. What we must avoid is letting talk about conspiracy become a paralyzing hobby.

We've all encountered defeatists and now Dr. Pierce reminds us how to deal with them: Cull, and cull hard!

New Bumper Sticker

With the quadrennial exercise known as the midterm election fast approaching, those receiving this **BULLETIN** are encouraged to vote if you care to, especially in your local elections, but also *against* anyone running for Senator, Congressman, or Governor who represents the unhinged Democratic Party. The Republican candidates certainly aren't much better, but they may buy us time by slowing down the flood of non-White invaders and the proliferation of anti-White legislation, runaway debt, etc. Whatever you do, though, *don't* let party politics deter you from your *essential and much more important* work for the Alliance.

We have produced a new bumper sticker with a thought-provoking Alliance message that is appropriate for members of the White electorate. One is enclosed; display it proudly. Order ten more while they last for \$20 postpaid. **W. W. W.**

**THE ANTI-WHITES WILL BE DEFEATED
BUT NOT BY VOTING**
